

Educa for Families

What is Educa?

Educa is an easy to use online service that helps teachers and families work together to record, share and extend your child's learning. Access Educa online or via our [iOS](#) or [Android](#) apps. It's free for parents.

Educa is child-centric. Your service will create your child's profile and then invite you to join via email. You can then invite other family members or interested third parties, e.g., a clinician.

Once you join Educa, you'll see your child's portfolio and get updates on your child's learning and progress. You'll be able to comment, ask questions and communicate with educators. Also, when your child moves on, you can download his/her portfolio as a keepsake.

Help Your Child, Get Involved!!

Be part of your child's day, no matter where you are.

"What did you do at school today?" "Nothing." Sound familiar? Once you connect via Educa, you can change that question, because you will be sent frequent snippets of learning.

Research has shown that feedback and reinforcement from family helps learning. Being able to ask more on-point questions about your child's day stimulates language and thinking. You can also review old stories to extend learning.

Private and Secure

Educa is an encrypted, password protected site monitored by online security specialists. Your information is private, and will never be shared with third parties.
